MALAPPURAM DT., KERALA-679 321

**PROGRAM REPORT**  
**WORKSHOP ON RESEARCH AND SPSS**  
**21.05.2022**

PG Department of Social Work and Sociology organised a one-day workshop on Research and SPSS on 21/05/2022 (Saturday) 9.30 AM in the department. The session handled by Mr. RATHEESH KUMAR KS (Faculty, CSB institute of learning and development, CSB Bank) SPSS (Statistical Package for the Social Sciences) is a software program used by researchers in various disciplines for quantitative analysis of complex data. This workshop introduces the SPSS environment, basic data preparation and management, descriptive statistics, and common statistical analysis (T-test, ANOVA, correlation, regression). Hands-on-activity with example data is provided to learn these basics. This workshop is a good start for MSW trainees who are new to SPSS and help you harness this useful analysis tool.

Although the name of SPSS reflects its original use in the field of social sciences, its use has since expanded into other data markets. SPSS is commonly used in healthcare, marketing and education research. The types of data analysed using SPSS are widely varied. Common sources include survey results, organization customer databases, Google Analytics, scientific research results and server log files. SPSS supports both analysis and modification of many kinds of data and almost all formats of structured data. The software supports spreadsheets, plain text files and relational databases such as SQL, SATA and SAS. SPSS provides data analysis for descriptive and bivariate statistics, numeral outcome predictions and predictions for identifying groups. The software also provides data transformation, graphing and direct marketing features. The total number of students participated in this session was eighteen. Although the session was very informative for the trainees to enhance their knowledge in the field of research.
