PROGRAM REPORT

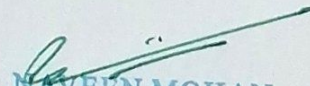

HANDS ON TRAINING ON PHOTOGRAPHY

10.08.2022

The collaboration between GEMS College Multimedia Department and the Photography Club, in association with HMS AUP School Thurakkal, to provide hands-on training on photography was a resounding success. This initiative aimed to equip students from HMS AUP School with the necessary photography skills to prepare for their sub-district science fair competition. The program took place on the 10th of August 2022, at the GEMS College Multimedia Lab, beginning at 11:00 AM. The venue was well-suited for this educational event, offering state-of-the-art facilities and equipment.

The training session covered a wide range of topics, including the fundamentals of photography, camera operation, composition techniques, and post-processing. Experienced instructors from GEMS College and the Photography Club led the workshops, providing valuable insights into the art of photography. Two students and one teacher participated in the training. Participants learned to manipulate camera settings, frame subjects creatively, and edit their images to enhance visual impact. The students from HMS AUP School were highly engaged and enthusiastic throughout the training. They actively participated in hands-on exercises, gaining practical experience that will undoubtedly benefit them in the upcoming science fair competition. This collaborative effort between the college, school, and photography club not only enhanced the students' photography skills but also fostered a sense of community and shared learning. It exemplified the power of educational institutions coming together to support and inspire the next generation. In conclusion, the hands-on training on photography provided by GEMS College Multimedia Department and the Photography Club, in association with HMS AUP School Thurakkal, was an invaluable learning experience for the students. About five members were participated in the program.
