PROGRAM REPORT
SAMAGRA SHIKSHA- 2022 FOR SCHOOL STUDENTS
12.02.2022

The Department of General Biotechnology generously provided its undergraduate laboratory for a phytochemical analysis program to benefit the students of HMSA UP School in Thurakkal, Manjeri. This collaborative initiative aimed to foster an early interest in biotechnology and environmental science among school students.

The program was attended by two enthusiastic students from HMSAUP School and one dedicated teacher. Their presence and active participation greatly contributed to the success of the event. During the program, the students had the opportunity to engage in hands-on experiments and learn about the process of phytochemical analysis. Under the guidance of the department's faculty members, the students gained practical insights into the world of biotechnology. The Department of General Biotechnology is committed to fostering educational outreach and promoting science among local schools. This collaboration was a positive step towards achieving this goal, providing students with a unique learning experience and encouraging their interest in the field of biotechnology.
