PROGRAM REPORT

FIELD VISIT TO LANDSLIDE-PRONE AREA IN KANNAPAMCHOLA, CALICUT

27.11.2018

Department of Geology conducted a field visit to landslide prone area near Kannapamchola in Calicut Kerala as an extensional activity on 27th November 2018. About 35 students visited the landslide-prone area where they conducted an extensive field survey with about 11 members of the community under the guidance of Abdul Rahman C V, Sajith Sadanandan, and Tinu C K. The aim of the survey was to analyze the entire area and suggest some remedial measures for the residents. As a part of the survey vulnerable slopes of the area were studied and other parameters were observed. The slope stability of the entire area was analyzed and risk factors were studied. Based on the study various spots were recognized as vulnerable and remedial measures were suggested to the landslide-vulnerable community.
