INTRODUCTION

GEMS Arts and Science College has undertaken a comprehensive gender audit from 2018 to 2023, examining the dynamics among students, teachers, non-teaching staff, and security and housekeeping personnel. This audit, with a total student population of 8884, reveals a gender distribution of 5160 male students and 3724 female students. Semester-wise and department-wise classifications provide a detailed understanding of gender variations within the student body.

In the teaching staff category, consisting of 435 individuals, the audit highlights 196 male and 239 female staff members. This breakdown underscores the importance of assessing gender balance within academic leadership and pedagogical roles, contributing to a nuanced understanding of faculty diversity.

Non-teaching staff, totalling 115 individuals, showed a gender distribution of 38 males and 77 females. This sector plays a vital role in the college's daily operations, and understanding the gender dynamics within this group is crucial for cultivating an inclusive and equitable work environment.

Security and housekeeping staff, comprising 124 individuals, demonstrated a gender distribution of 47 males and 77 females. This aspect of the audit emphasizes the need for gender awareness in roles beyond academia, acknowledging the significance of equity in all facets of institutional support.

The gender audit at GEMS Arts and Science College signifies a commitment to promoting gender equity and inclusivity across the institution. By examining gender variations within different staff categories and departments, the college aims to identify strengths, challenges, and implement targeted initiatives to create a more gender-sensitive educational environment.

This audit is not a mere statistical exercise; it represents an acknowledgment of diverse experiences and a commitment to fostering a culture that values the unique attributes of each gender. GEMS Arts and Science College seeks to create an atmosphere conducive to personal and professional growth for all, recognizing that gender dynamics are multifaceted and interconnected with various aspects of campus life.

In the subsequent sections of this report, a detailed exploration of the findings will delve into trends and patterns within each category of students and staff. The college aims to derive actionable insights that will inform future policies, initiatives, and practices, contributing to a more equitable and inclusive educational landscape at GEMS Arts and Science College. This commitment to transparency, accountability, and continuous improvement underscores the college's dedication to fostering a gender-inclusive environment.

6th SEMESTER UG BBA

GENDER	NUMBER OF STUDENTS	TOTAL
MALE	47	56
FEMALE	9	

The gender audit data analysis in the Department of Management Studies for the 2022–23 academic year is depicted in the above-mentioned graphs. The forty-seven students in the second semester of UG are divided into thirty males and seventeen females. Out of the fifty-two students, there are forty male and twelve female students in the fourth-semester UG class. Forty-seven out of the fifty-six students in the sixth-semester UG class are male, and nine are female. Examination of each of the above-mentioned graphs reveals that there are more male students than female students in each class.

GENDER	NUMBER OF STUDENTS	TOTAL
MALE	30	33
FEMALE	3	

The analysis of gender audit data for the Department of Travel and Tourism Management in the academic year 2022–23 is depicted in the graphs provided. In the second semester UG class, there are forty-four students, with thirty-two males and twelve females. Moving to the fourth semester UG class, there are forty-five students, consisting of thirty-seven males and eight females. Lastly, the sixth semester UG class comprises thirty-three students, among whom thirty are males and three are females. A review of the graphs consistently shows a higher number of male students compared to female students in all classes.

GENDER	NUMBER OF STUDENTS	TOTAL
MALE	22	28
FEMALE	6	

The Gender Audit data analysis in the Department of Computer Application for the academic year 2022–23 is illustrated in the above-mentioned graphs. There are forty-seven students in the second semester UG class, where there are thirty-seven males and ten females, respectively. There are forty students in the fourth semester UG class, of whom thirty-two are male and eight are female. Twenty-two out of the twenty-eight students in the sixth semester UG class are male, and six are female. The evaluation of the above-mentioned graphs displays that there are more male students than female students in each class.

GENDER	NUMBER OF STUDENTS	TOTAL
MALE	27	36
FEMALE	9	

The gender audit data analysis in the Department of Computer Application for the academic year 2021–22 is illustrated in the above-mentioned graphs. There are forty-one students in the second semester of UG class, where there are thirty-three and eight males and females, respectively. There are twenty-eight students in the fourth semester UG class, of whom twenty-two are male and eight are female. Twenty-seven out of the thirty-six students in the sixth semester UG class are male, and nine are female. The evaluation of the above-mentioned graphs displays that there are more male students than female students in each class.

The gender audit data analysis of the Department of Management Studies for the 2020–21 academic years is depicted in the above-mentioned graphs. The first graph shows the second-semester UG management studies. Here we can see that forty-seven students are from the male category and eleven students are from the female category. When it comes to fourth-semester UG management studies, this also shows that the number of male students is higher when compared with female students. That means out of forty-seven, thirty-six students are from the male category, and eleven students are from the female category. The final graph shows the sixth semester of UG management studies, out of which thirty-three students are from the male category and thirteen students are from the female category. By analyzing all these above-mentioned graphs, we can understand that the male category is higher than the female category.

GENDER	NUMBER OF STUDENTS	TOTAL
MALE	30	33
FEMALE	3	

The gender audit data analysis of the Department of Computer Application for the 2020–21 academic years is depicted in the above-mentioned graphs. The first graph mentioned here is for the second semester of UG Computer Application. The total number of class members is twenty-eight. Out of which twenty-two students are from the male category and six students are from the female category. The second graph shown here is a fourth-semester UG computer application. Among these, it is clearly understandable that twenty-seven students are from the male category and nine students are from the female category. The last graph depicted here is a sixth-semester UG computer application. It clearly shows that the majority of the students are from the male category, which means that out of the thirty-three students, thirty are from the male category, whereas the remaining three students are from the female category. So examining all these graphs mentioned above, there are more male students than we can see over here.

FEMALE	7	

The Gender Audit data analysis of the Department of Travel and Tourism Management for the 2020–21 academic years is depicted in the above-mentioned graphs. In the second semester of UG travel and tourism, thirty-four students are divided into thirty male students and four female students. In the fourth semester of UG travel and tourism, the total number of students is forty-one, out of which thirty-seven are from the male category and the remaining four are from the female category. And the final graph shows here is sixth semester UG travel and tourism. Out of thirty-six students, twenty-nine students are from the male category and seven are from the female category. In all the semester males outnumbered females.

6TH SEMESTER B.Com CA

GENDER	NUMBER OF STUDENTS	TOTAL
MALE	46	57
FEMALE	11	

The gender audit data analysis of the PG Department of Commerce for the 2020–21 academic year is depicted in the above-mentioned graphs. In the second semester of B.Com.CA, we can see that the number of male students is high, whereas the number of female students is lower when compared with male students. That means out of forty-eight, thirty six numbers are from the male category. And twelve students are from the female category. The following graph is a fourth semester B.com.CA graph, and here we can see that male students are high when compared with female students. That means out of forty-six, thirty-seven students are from the male category, and the remaining nine students are from the female category. Sixth semester B.com CA also shows that out of fifty-seven students, forty-six are from the male category and eleven are from the female category. So these above-mentioned graphs depict that the number of male students is high in the second, fourth, and sixth semesters of the year 2020–21.

6TH SEMESTER B.Com CO-OPERATION

GENDER	NUMBER OF STUDENTS	TOTAL
MALE	36	45
FEMALE	9	

The gender audit data analysis of the PG Department of Commerce in the years 2020–21 is depicted here. The graph of second semester B.com co-operation shows that, out of fifty-four students, forty-two are from the male category, whereas the remaining twelve are from the female category. When it comes to fourth semester B.com Co-operation, it clearly shows that the number of male students is higher than the number of female students. This means, out of fifty-five students, forty-seven students are from the male category, and the remaining eight are from the female category. The next graph here we can see is the sixth semester of B.Com Co-operation. Here also, we can see that, out of forty-five students, thirty-six are from the male category and nine are from the female category. Examining each of the above-mentioned graphs reveals that there are more male students than female students in this batch.

6TH SEMESTER B.Com FINANCE

GENDER	NUMBER OF STUDENTS	TOTAL
MALE	45	57
FEMALE	12	

The gender audit data analysis of the PG Department of Commerce for the 2020–21 academic year is depicted in the above-mentioned graphs. There are forty-nine students in the second semester of B.com Finance, out of which thirty-three are male and sixteen are female. The fourth semester of B.com Finance reveals that, out of a total of fifty-seven, forty-six students are from the male category and eleven students are from the female category. So this graph clearly shows that the number of female students is lower when compared with male students. When it comes to the sixth semester of B.com Finance, it is clearly understandable that the number of males is higher than the number of females. This means out of fifty-seven students in the class, forty-five are from the male category, and the remaining twelve are from the female category.

FEMALE	29	

The gender audit data analysis of PG Department of Social Work and Sociology for the 2020–21 academic year is depicted in the above-mentioned graphs. In the second semester of UG sociology, the number of females is higher when compared with the number of males. Out of forty-five students in the class, twenty-seven students are from the female category and eighteen are from the male category. The next graph shows that in fourth semester UG sociology, the majority of students are from the female category, which means twenty-nine students out of fifty-two are from the female category, whereas twenty-three students are from the male category. And the last graph shows sixth-semester UG sociology, there are fifty-one students in the class, out of which twenty-nine are from the female category and twenty-two are from the male category. So out of these graphs, it is clear that the number of female students is higher than the number of male students.

The gender audit data analysis of the PG Department of Commerce for the academic year 2019–20 is represented in the above graphs. From the graphs, it can be noted that the second semester UG B.Com finance class contains a total of fifty-seven students, of forty-six are female, and the number of female students is eleven. In the fourth semester UG class, out of fifty-seven students, there are forty-five male and twelve female students. The sixth semester UG class contains forty-seven male students and seven female students out of fifty-four students in total. Thus, from the graphs, it is evident that in the academic year 2019-20 in the B.Com finance class, more than 50% of the total students are male.

The Department of Mathematics' Gender Audit Data Analysis for the 2018–19 academic year is displayed in the aforementioned graphs. The total number of students in the UG second semester is forty-two, consisting of twelve male and thirty female students. Eight out of the thirty-four UG students are male, while twenty-six are female in the UG fourth semester. In the sixth semester of UG, there are ten students, and all ten are female. Examining each of the aforementioned graphs reveals that, in every semester, the number of female students exceeds that of male students.

CONCLUSION

In conclusion, the gender audit conducted by GEMS Arts and Science College over the last five years has provided invaluable insights into the nuanced dynamics of gender representation within the institution. The meticulous examination of students, teachers, non-teaching staff, and security and housekeeping personnel has illuminated both the achievements and challenges in fostering a Gender-Inclusive Environment.

The data, revealing a total student count of 8884 with 5160 male students and 3724 female students, serves as a foundation for targeted interventions and initiatives. Semester-wise and department-wise classifications enable a granular understanding of gender variations within the student body, facilitating a tailored approach to address specific needs in different academic contexts.

In the realm of teaching staff, the gender breakdown of 196 male and 239 female members prompts reflection on academic leadership and pedagogical roles. This awareness lays the groundwork for fostering diversity and equity within the faculty, ultimately contributing to a richer educational experience.

The Non-Teaching Staff, comprising 115 individuals with a gender distribution of 38 males and 77 females, plays a crucial role in the college's functioning. Recognizing the importance of gender dynamics within this group is pivotal for cultivating an inclusive and equitable work environment, ensuring that all staff members contribute to the college's success.

Similarly, the audit of security and housekeeping staff, with 47 males and 77 females among the 124 individuals, underscores the need for gender sensitivity in roles beyond academia. This holistic approach recognizes that gender inclusivity extends to all facets of institutional support, promoting a balanced and respectful environment for everyone involved.

As GEMS Arts and Science College reflects on these findings, the commitment to transparency, accountability, and continuous improvement shines through. The college is poised to leverage these insights into actionable initiatives that will further enhance its commitment to diversity and equity. By acknowledging the multifaceted nature of gender dynamics and actively working towards creating an environment that values the unique contributions of all genders.
