

INTERACTIVE TOUCH KIOSKS TO COLLEGE AND LIBRARY AND IN/OUT

KIOSK

Gems Arts and Science College embraces technological innovation with the implementation of two Kiosk Touch Panels and an In/Out Kiosk, enhancing communication, information dissemination, and administrative processes on campus.

The first Kiosk Touch Panel, strategically placed in the college premises, serves as an interactive hub for students and faculty. It provides real-time updates on college activities, programs, and facilities, fostering seamless communication and engagement. Users can effortlessly access information about events, academic schedules, and campus resources, enhancing overall connectivity within the college community.

The second Kiosk Touch Panel, located in the library, streamlines library dealings. It offers a user-friendly interface for students and researchers to access catalog information, check availability of books, and receive updates on library programs. This ensures efficient utilization of library resources and promotes a conducive learning environment.

The In/Out Kiosk at Library simplifies attendance tracking with an electronic register. This innovative system allows students and staff to log in and out conveniently, reducing administrative overhead and providing a streamlined approach to attendance management.

Gems Arts and Science College's investment in these advanced kiosk technologies not only modernizes campus operations but also reflects its commitment to fostering a tech-savvy, interactive, and efficient educational environment.
